"PARTIAL DENTURES"

CO-RE-GA, on account of its long resistance to oral fluids, is of material aid in dividing the load evenly over the basal seat, and, at the same time, assisting adaptation.

In many cases CO-RE-GA also prevents mandibular removable bridges from rocking or wabbling.

TRUE DENTALLOY SIGRENS

Assure correct alloy-mercury ratio

True Dentalloy Sigrens and the S. S. White Mercury Dispenser eliminate guesswork proportioning, and provide a simple means which will enable you to prepare uniform and better amalgam fillings.

Each Sigrens contains the correct amount of alloy—six grains—for one dispensing of mercury from the Mercury Dispenser: ratio, $7\frac{1}{2}$ parts mercury to 5 parts alloy.

Using Sigrens is like opening a fresh bottle of alloy for every filling. Moreover, they are easy to use and they tend to eliminate waste.

Try SIGRENS without cost or obligation

Convince yourself they are more accurate and economical for dispensing alloy

Order a "NEW USER PACKAGE" of SIGRENS from your salesman

NEW USER PACKAGE OF SIGRENS

Contents

- 5 one-ounce packages, each containing 80 Sigrens
- 1 Mercury Dispenser and empty mercury bottle
- 1 Free Trial package containing 20 Sigrens

\$9.75
PRICE

Use the Sigrens in the *Free Trial* package. If you like this new and accurate method of dispensing True Dentalloy, accept the charge of \$9.75. If not, return the five 1-oz. packages *intact*, together with the Mercury Dispenser, and receive full credit.

1-oz. pkg., 80 Sigrens \$2.00

SIGRENS

is a registered trade-mark indicating the origin of a hermetically sealed, dust- and moisture-proof, transparent envelope containing six grains of True Dentalloy.

REPUTATIONS ARE MADE *when dentures are discussed in business offices*

OUTSTANDING ADVANTAGES

- It has ample strength (toughness without brittleness).
- It is permanently lifelike in color.
- It is stable in form.
- It does not develop internal strains.
- It has a hard surface, easily cleaned.
- It is readily repaired.
- It is ideal for both partial and full dentures.
- It reproduces accurately.
- It does not irritate oral tissues.

Denture work done in the dentist's office is only part of the picture. It's the conversations that take place afterwards—when patients talk about their dentures—that determine dental reputations.

If favorable comments could only be assured!

They can! In talking to your laboratory, specify *Lucitone*—the denture material recommended and guaranteed by both Du Pont and Caulk.

Because *Lucitone* is so precisely made and thoroughly tested, its satisfactory behavior in the mouth is assured. *Lucitone* means lasting peace-of-mind for your patients.

Where the Subway Will Concentrate Traffic

In every city where subways have been built, appreciation of the effect of concentration of traffic has brought success to many businesses.

When the Chicago Subway begins operation, the Field Annex Building, within a short one-half block of the State and Washington Street exits, will be even more centrally convenient than at present.

To physicians and dentists seeking a location that will materially help in building up their clientele, this factor is vital.

THE CALENDAR

November 18th: West Suburban Round Table: Regular weekly luncheon meeting. Speaker: Dr. R. W. McNulty. Topic: *Trends in Dental Education*. Oak Manor Hotel, 213 North Oak Park Avenue, Oak Park. 12:00 m.

November 18th: Chicago Dental Society: Regular monthly meeting. Special speaker: Dr. Eben J. Carey, Curator of the Museum of Science and Industry. Topic: *The Public and Scientific Dentistry and Medicine*. Symposium on *Acrylics*. Speakers: Drs. Stanley D. Tylman, Henry Glupker and Eugene W. Skinner. Meeting, 8:00 p.m. Business session, 8:30 p.m. Scientific session, 8:45 p.m. Clinics, 10:00 p.m. Grand Ball Room, Palmer House.

November 18th: West Side Dental Forum: Regular weekly luncheon meeting. Motion picture on *Vitamin 1 B Complex*. Solick's Restaurant, 4207 West Madison Street. 12:00 m.

November 18th: Xi Psi Phi Fraternity: Dinner, 6:30 p.m. Palmer House. Notice will be posted on bulletin board.

November 25th: West Suburban Round Table: Regular weekly luncheon meeting. Speaker: Dr. Albert Buchner Coe. Topic: *Suggested Bases for a Just and Durable Peace*. Oak Manor Hotel, 213 North Oak Park Avenue, Oak Park. 12:00 m.

November 25th: West Side Dental Forum: Regular weekly luncheon meeting. Speaker: Dr. Robert G. Kesel. Topic: Motion picture on *Vital Pulp Removal and Root Canal Filling*. Solick's Restaurant, 4207 West Madison Street. 12:00 m.

December 1st: North Side Branch: Regular monthly meeting. Speaker: Dr. Stanley D. Tylman. Topic: *Acrylics*. Dinner, 6:30 p.m. Meeting, 8:00 p.m. Michigan Room, Edgewater Beach Hotel.

December 1st: Greater New York Dental Meeting: First and Second District Dental Societies' annual five-day meeting. For further information, address all communications to Room 106A, Hotel Pennsylvania, New York, New York.

December 2nd: South Suburban Branch: Regular monthly meeting. Program on *Acrylics*. Speaker to be announced in the next issue. Dinner, 6:30 p.m. Meeting, 8:00 p.m. Harvey Elks Club, Harvey.

December 2nd: Kenwood-Hyde Park Branch: Regular monthly meeting. Speaker: Captain Joseph A. Tartre, (DC) U. S. Navy. Topic: *Navy Dental Corps*. Motion picture on Navy Dental School in Washington, D. C. Past Presidents' Night. Dinner, 6:30 p.m. Meeting, 8:00 p.m. Del Prado Hotel, 5307 South Hyde Park Boulevard.

December 2nd: West Suburban Round Table: Regular weekly luncheon meeting. Speaker: Dr. Henry Stimson. Topic: *A Workable Denture Occlusion*. Oak Manor Hotel, 213 North Oak Park Avenue, Oak Park. 12:00 m.

December 2nd: West Side Dental Forum: Regular weekly luncheon meeting. Speaker: E. R. Butterfield. Topic: *Dentifrices*. Solick's Restaurant, 4207 West Madison Street. 12:00 m.

December 3rd: University of Illinois College of Dentistry Alumni: Annual homecoming. Scientific program to be announced in the next issue. Complimentary luncheon at noon. Banquet in evening at Illini Union Building, 800 South Wood Street.

December 9th: Englewood Branch: Regular monthly meeting. Past Presidents' and Old Timers' Night. Entertainment program. Dinner, 6:30 p.m. Hayes Hotel, 64th Street and Union Avenue.

December 9th: West Side Branch: Regular monthly meeting. Program on *Periodontia*. Speaker to be announced in the next issue. Entertainment will follow dinner at 6:30 p.m. Meeting, 8:00 p.m. Graemere Hotel, Washington Boulevard and Homan Avenue.

Announcements for this department are solicited but must be received at the Editorial Office not later than the eighth and twenty-third of each month.

Symposium and Table Clinics on Acrylics Feature November Monthly Meeting

A half-hour talk on the subject of *The Public and Scientific Medicine and Dentistry* and several table clinics dealing with acrylic resins will augment the symposium on *Acrylics* at the Chicago Dental Society meeting November 18. The meeting will be held in the Grand Ball Room of the Palmer House, rather than in the Red Lacquer Room as previously announced.

CAREY

Dr. Eben J. Carey, Curator of the Museum of Science and Industry and Dean of Marquette University, School of Medicine, will be the special speaker. His topic will be *The Public and Scientific Medicine and Dentistry* or, more broadly, *The Health Professions and the Public*. He will be presented by Dr. Robert L. Kreiner, acting chairman of the Special Program Committee. Dr. Carey has had a wide field of experience and his talk should prove very enlightening. He will stress the responsibility of the physician, dentist and pharmacist in cooperating as members of the health professions in the education of the public both from a public and personal aspect. Great advances have been made in the field of public health but greater advances will be made in the future, with lay cooperation, in reducing the incidence of disease of age, i.e., heart, kidney, blood, vascular, nervous and mental diseases. Dentistry, medicine and pharmacy must cooperate and assume this

responsibility of lay education if they do not desire to have this responsibility taken over by the State.

The symposium on *Acrylics* will follow a short business meeting and should get under way at 8:45 p.m. Dr. Stanley D. Tylman will discuss acrylics from the standpoint of crown and bridge prosthesis; Dr. Henry Glupker, from the standpoint of full denture construction, and Dr. Eugene W. Skinner from the standpoint of the physicist and chemist. Dr. D. Munger Hodgman, Chairman of the Monthly Meeting Program Committee, states that these men are authorities in their respective fields.

CLINICS

Several table clinics demonstrating the use of acrylic resins will follow the symposium. Dr. Richard J. Quiter, Vice-Chairman, will be responsible for this part of the program. The list of clinicians and their subjects are as follows: Drs. A. P. Craig, of Gary, *Permanent Liner for Acrylic Dentures without Processing*; Carl O. Schramm, *Acrylic Inlays of One Color*; Walter A. Wykhuys, *Electroplating Denture Impressions*; Joseph A. Smith, *Acrylics as Applied in Operative Dentistry*; C. E. Waterman, *Processing Acrylic as a Substitute for Porcelain Teeth*; Henry Glupker, *A Technic Demonstrating Flasking, Foiling, Packing of Acrylic Resins*.

A.D.A. Preparedness Committee Reports on the State of the Nation with Respect to Dental Supplies

Text of Report as Presented to the House of Delegates at Annual Meeting in Houston

The following report of the Committee on Dental Preparedness of the American Dental Association, which was read before the House of Delegates at the annual meeting in Houston, presents some illuminating facts:

MILITARY NEEDS

"It is conceded that the emergency military needs created by the program of National Defense are of transcending importance and that preference must be given by manufacturers to the dental needs of the military encampments. The large number of young men rapidly flowing into the training centers of the country must be kept on a high plane of physical fitness, and constant dental attention is a part of the routine health service necessary to maintain the physical condition of the soldier at the highest possible point. It has been imperative to equip promptly all camps with adequate dental facilities. To furnish dental office equipment, instruments and supplies adequate for this purpose has placed an immediate strain upon the manufacturers that has appreciably affected the normal services usually provided the private practitioner.

INCREASED DEMAND

"An added pressure on the manufacturer has come from the increased demand for dental services created by accelerated business activities among industrial organizations now engaged in the manufacture of materials for war in which workers must be kept at a high degree of physical efficiency. This need for a competent health service to workers in the war industries has increased the normal demand for dental service and this demand has increased the need

of the practitioner for equipment, materials and supplies. Reports reaching the Committee indicate that the demand for civilian dental service has advanced far beyond the level of any previous period and as a consequence a serious disparity has been created between the production and the consumption of dental materials. This sudden increase in the demand for civilian dental service calls for a readjustment of the supply and demand of operating facilities in which the dentist, the retailer and the manufacturer must enter.

FORWARD BUYING

"Another serious problem entering into and complicating the picture is the practice of some to indulge in *forward buying*, or to use the nomenclature of the first world war, the *hoarding* of dental supplies. This fault lies primarily at the door of the retail salesmen who, in their zeal to advance quickly their business, urge the dentist to purchase and to store large quantities as insurance against impending shortage; the dentist, actuated both by fear and thrift, buys in quantity and stores the materials for future use, thus making inactive in the aggregate large quantities of reserve supplies upon which the manufacturer would ordinarily depend when an upward trend in consumption occurs. Abnormal buying coincident with the diversion of the normal supply to provide for the needs of the armed forces seriously depletes the normal surplus which manufacturers must maintain if the current needs of the profession are to be met. As a consequence of abnormal forward buying it is impossible for manufacturers, even with a sharply stepped up production capacity, to supply the armed forces, the *hoarder* and the ac-

celerated needs of the private practitioner. Dental supply house representatives, sensing an opportunity for greater immediate profits, are encouraging dentists to buy through representations that a shortage of materials will soon develop; this warning incites the dentist to purchase in quantity in order to insure his stock against future contingencies. This practice should be vigorously discouraged. In order to restore balance in production and delivery retailers and salesmen should refrain from creating alarm and members of the dental profession should do no more forward buying than is customary under normal conditions.

MANUFACTURING DIFFICULTIES

"The necessity for providing the armed forces with needed equipment and for serving adequately the needs of the profession has thrown a great burden upon the dental manufacturers and has created a serious situation, the correction of which requires the fullest cooperation of all parties concerned. Manufacturers have stepped up production and have in some instances expanded production facilities. But it is unfair to expect manufacturers to expand their production facilities out of proportion to normal needs by installing additional equipment necessary to manufacture greater quantities merely to take care of an artificially created emergency. Should this be done the post-war period will doubtless bring upon them an inactivity that will render enlarged facilities useless and cause financial loss to the owners. The dental trades assures the profession that it has stepped up production as rapidly as possible and that it will do everything necessary to meet both the military and civil needs of the country and the procurement agencies are prepared to recognize priorities in dealing with the dental problems. The profession will doubtless take the same broad point of view in adjusting itself to the irritations of this acute situation.

STATUS OF RESOURCES

"The general picture with respect to the manufacturers' services to the profession is not discouraging though it reveals the necessity for close cooperation among all concerned.

"(a) *Equipment* — This group includes dental office equipment, such as x-rays, chairs, units, lights, sterilizers, compressors, cabinets, etc. The manufacturers of equipment are producing so far in 1941 well beyond their production of 1939. One company reports that its production of dental equipment during the first six months of 1941 was approximately 90% higher than the corresponding period of 1939; another company reports that the percentage of increase in 1941 over 1939 is approximately 70%. These companies are now busily engaged in working on defense orders which must be filled at an early date in order that camps may be prepared to take care of urgent dental situations arising in them. In spite of the pressure from military orders manufacturers are in a position to fill the equipment orders of civilian dentists within a reasonable period of time, that is, from two to four months. The profession can readily understand that under the stress of war conditions *immediate* deliveries of equipment cannot be expected.

"(b) *Instruments* — Deliveries of instruments such as hand pieces, right angles, cutting instruments, condensers, automatic mallets, surgical instruments, etc., present a similar picture to that of office equipment. One company reports that so far in 1941 production is at least 25% over production for the same period of 1940 and it is believed that production in this plant may reach a 30% increase before the end of the year; another company shows tremendous increase in 1941 over 1939 as follows: hand pieces, angles, etc., 189%; burs, 264%; elevators, forceps, pliers, 114%; steel instruments, 58%. These figures suggest the capacity of manufacturing plants to meet all needs provided all patiently assist the producers in

catching up with accumulated needs.

"(c) Materials and Supplies—This group includes sundry merchandise of all kinds—golds, alloys, mercury, teeth, waxes, etc. A careful study of the production of these materials is encouraging. One company reports an increase in production and deliveries in 1941 of 63% over the same period of 1939; another company reports that production in 1941 is from 35 to 40% more than in 1939, and they estimate that their production in 1941 of dental burs and other items, such as plasters, investments, needles and compounds, will run at least 40% more than in 1939.

"A large tooth manufacturing concern reports tremendous gains in production in 1941 over 1940. There is reasonable evidence to show that any shortage of porcelain teeth or any difficulty in securing them has not been occasioned by government buying. Prior to the depression years all dental laboratories maintained an appreciable surplus stock of teeth. Since that time a large number of laboratories have used up their stocks and have since purchased as needed from local dental supply houses. During the current year many commercial dental laboratories have restocked with large supplies and surpluses of teeth. In addition to the drain on surpluses made by laboratories, four prominent advertising dentists on the Pacific have purchased so far in 1941 a total of \$132,000 worth of teeth, a quantity three times as large as the Army purchased in 1939, or over 100% more than the Army has purchased in 1941. These heavy encroachments offer a serious threat to the needs of the civilian dentist over which the manufacturers and the armed forces have little control. Both, however, are very earnest in their desire to cooperate with the civilian dentist. The manufacturers will do their best to supply the profession with the necessities and the Procurement Division of the Medical Department of the armed forces has signified its earnest desire to cooperate in an equitable distribution of all materials and supplies.

"(d) Observation—It has been difficult for the manufacturer to obtain raw materials because of priorities and because the materials used in the manufacture of dental goods are in strong competition with the manufacture of war materials or the manufacture of precision instruments essential to the production of war materials. Nevertheless, production has appreciably advanced during 1941. The bur situation is complicated because of heavy orders that have been placed by the armed forces, because of the accelerated demand by the civilian population for more general dental work and because of the disposition of some members of the profession to hoard supplies. It has been necessary for manufacturers to discontinue certain types of burs and to reduce the broad scope of special types. This has been done after a careful survey of the demand for various types of burs and in cases where there is limited demand for a particular number that number has been discontinued in the interest of those more universally used. It is felt that no injury will be done the profession by this action and that civilian dentists will be obliged to adjust themselves to these necessary limitations. Within the limits fixed by the foregoing restraints the manufacturer will do the best possible to supply the profession with necessities and the Procurement Representative of the Medical Department of the Army will gladly cooperate in the interest of an equitable distribution of supplies to the profession.

PRIORITY RATING

"Dentistry's place in the defense effort has been recognized by the armed forces, and the Medical Department of the Army not only has provided adequately for the care of men under arms, but has consistently tried to protect and to promote the security of dentistry in the civilian picture. On August 25, 1941, the Office of Production Management released the Health Supplies Rating Plan, under which dental instruments,

operating room equipment and supplies, anaesthetic apparatus, diagnostic equipment and supplies, and dental x-rays, were specifically mentioned. However, the scope of this order was not such as to clearly define a rating for *all* dental supplies and equipment, and on October 6 Donald M. Nelson, Director of Priorities, released an order amending the Health Supplies Rating Plan, specifically recognizing 'dental' as being included in the plan, and the products listed below are covered in the 'medical, surgical, dental and veterinarian' classifications. The items marked with an asterisk seem to cover any and all classifications under which dental supplies and equipment may come:

1. Acoustic aids
- *2. Anaesthesia apparatus and supplies
- *3. Atomizers (medical use only)
- *4. Biologicals, anti-toxins, serums, sterile ampoules and intravenous solutions
5. Clinical thermometers
- *6. Diagnostic equipment and supplies
7. Hospital carts, racks and charts
- *8. Hypodermic syringes and needles
9. Infant incubators
- *10. Instruments
11. Invalid chairs, walkers and crutches
- *12. Laboratory equipment and supplies
- *13. Medicinal chemicals (limited to

medical use only)

- *14. Operating room supplies and equipment
15. Ophthalmic products and instruments
- *16. Physical therapy equipment (limited to medical use only)
17. Respirators, resuscitators and iron lungs
- *18. Rubber hospital sundries
19. Sick room furniture, equipment and supplies
- *20. Splints and fracture equipment
- *21. Sterilizers, blanket and solution warmers
- *22. Surgical dressings and adhesive plasters
23. Surgical and orthopaedic appliances (including artificial limbs and arms)
- *24. Sutures and suture needles
- *25. X-ray equipment and supplies

"This order provides an A-10 rating for manufacturers producing items under the classifications stated, and is considered favorable and as high as may be expected. It will enable dental manufacturers to obtain more readily raw materials—in fact, evidence of this has already been furnished by a number who have announced that they find the rating helpful. Of course, certain materials on the rating list may be difficult or impossible to obtain, but it is believed that, within the scope of the emergency, the situation has been as capably met as can be expected."

Recurrent Scarring Painful Aphthae: The author describes two cases of a rare form of painful aphthae which begins as a small nodule within and beneath the mucous membrane of the lip, cheek or tongue. The lesion increases in size, sloughs and causes severe pain, becomes a crateriform ulcer with inflamed firm borders, runs a course uninfluenced by local treatment and eventually heals leaving a soft whitish depressed scar. The patients usually show a mouth showing many scars, and they report the lesions are extremely painful when present.

In one of the cases described by the author, sulfathiazole, 1 gram, four times a day for 20 days and 1.5 grams four times a day for four days caused the patient's mouth to heal completely "for the first time in four or five

years." The second case cleared up after 0.5 grams of sulfathiazole three times a day for five days. The drug did not present recurrence of the lesions but gave quick relief again.—*Recurrent Scarring Painful Aphthae*, Sutton, Jr., Richard L., M.D. *J.A.M.A.* 117: 175 (July 19) 1941. Abstracted by M. K. Hine.

Bill to Restrict Mail Order Dentures: H. R. 5674, introduced by Representative Traynor, Delaware, undertakes to protect the public health by the prevention of certain practices "leading to dental disorders; and to prevent the circumvention of certain state laws regulating the practice of dentistry." The apparent purpose of this bill is to restrict mail order business in dentures.—*J.A.M.A.* 117: 1105 (September 27) 1941.

CHICAGO DENTAL SOCIETY MEETING

Palmer House -- Grand Ball Room

November 18 -- 8:00 P.M.

SOCIETY AFFAIRS

Official Minutes of the Regular Monthly Meeting Held at the Palmer House on October 6

The October Monthly Meeting of the Chicago Dental Society was held on Monday, October 6, at the Palmer House in Chicago. A resolution was presented at the business session which the membership will be asked to vote upon at the next regular meeting on November 18. It is incorporated in the following official minutes of the meeting as prepared by the Secretary, Dr. Harold W. Oppice.

SPECIAL PROGRAM

The meeting was called to order by President Glenn E. Cartwright at 8:15 p.m. Dr. Cartwright expressed appreciation for the fine attendance at this opening meeting and explained in some detail the reasons for having our monthly meetings and the Midwinter Meeting at the Palmer House this year.

He introduced Dr. Lon W. Morrey, Chairman of the special division of the Monthly Meeting Program Committee, with the request that he introduce the preliminary speaker. Dr. Morrey then introduced Mr. Hal Totten, sports announcer for the National Broadcasting Company, who gave an interesting and entertaining talk on the 1941 major league baseball season. At the conclusion of Mr. Totten's talk, Dr. Cartwright expressed the Society's appreciation for his contribution to the program.

BUSINESS SESSION

The chair called for a motion to dispense with the reading of the minutes of the last regular meeting. Motion was made and severally seconded that the reading of the minutes of the last meeting be dispensed with owing to publica-

tion in THE FORTNIGHTLY REVIEW. Motion carried.

Motion was then made and severally seconded that the minutes of the last regular meeting be approved as published in THE FORTNIGHTLY REVIEW. Motion carried.

The Secretary, Dr. Harold W. Oppice, offered the following resolution, which had previously received approval of the Board of Directors:

"For some years it has been the practice of the Chicago Dental Society, its branch societies, alumni associations of dental schools and colleges, dental fraternities and other groups of dentists to accept prizes free of charge from outside agencies, notably dental supply houses and laboratories, for distribution at athletic and social events sponsored by these groups. It has also been the practice to solicit such prizes from dental supply houses and laboratories if not offered. In fact, so widespread has this become that one group of manufacturers and dealers has actually established what might be called a protective committee whose duty it is to establish a "Prize budget" for the members of that group thus forging a weapon of defense against individual solicitation of its members by representatives of dental groups.

"It is the opinion of the officers of this Society that the solicitation or acceptance of prizes as described above is undignified, improper, wholly unnecessary and tends to hold the dental profession up to ridicule.

"Be it Resolved, therefore, that the Chicago Dental Society, by action of its members in regular meeting assembled, concur in the views expressed in the preamble, and direct the proper agencies of the Society to cease solicitation or acceptance directly or indirectly of prizes from any source outside organized dentistry for any events sponsored by the aforementioned agencies, and, be it further

"Resolved, that the branch societies and dental groups not affiliated with organized dentistry be informed of this action and that we recommend to them the adoption of a parallel policy, and, be it further

"Resolved, that a copy of this resolution be

sent to the editor of our official magazine for publication. *Glenn E. Cartwright, President; Willis J. Bray, President-Elect; Christian Davidson, Vice-President; Harold W. Oppice, Secretary; Leo W. Kremer, Treasurer.*"

The chair announced that in accordance with our By-Laws action on the resolution would have to be postponed until the next regular meeting and in the interim it would be published in the official publication.

The Secretary next read the following report of a special committee appointed to set up rules and regulations governing an essay contest to be conducted in conjunction with the Midwinter Meeting.

Dr. Oppice stated that this report, which was published in THE FORTNIGHTLY REVIEW of October 1, 1941, had been approved by the Board of Directors and that its adoption was recommended by that body. Motion was then regularly made and severally seconded that the report be adopted. Motion carried.

Dr. Charles W. Freeman asked for the floor, stating that he was speaking at the request of Dr. F. B. Noyes, Chairman of the Dental Division of the Community Fund, who was not able to be here. Dr. Freeman called attention to the work of the Community Fund and introduced a special speaker from the Fund, who

Rapidly Developing Dental Caries: A white man aged 35 has been visiting his dentist twice a year for a number of years. He had been advised by his dentist that eighteen cavities had developed in his teeth since examination six months before. On questioning, it was found that he was not eating a balanced diet. He was advised in this respect and given di-calcium phosphate with viosterol and cod liver oil and was told to drink a quart of milk a day. His blood calcium level was reported to be 7.8 mg. per hundred cubic centimeters by a reliable laboratory; on Dec. 28, 1938, the level was 8.2 mg. per hundred cubic centimeters and on May 25 it was 8.8 mg. per hundred cubic centimeters. He was also given decholin. In February 1941 he again visited his dentist who advised him that twenty-one additional cavities had appeared since the last examination. Physical examination of this person shows him to be apparently otherwise normal. Any suggestion that you can offer concerning treatment will be greatly appreciated.

gave some information pertaining to the activities of that organization and urged full support by members of the dental profession.

Announcement was made that the meeting date of the Englewood Branch had been changed from October 14 to October 21.

SCIENTIFIC SESSION

President Cartwright called the scientific meeting to order and introduced the Chairman of the Monthly Meeting Program Committee, Dr. D. M. Hodgman, with the request that he introduce the essayist. In a brief statement Dr. Hodgman introduced the speaker, George W. Crane, M.D., Ph.D., who spoke on *The Psychological Strategy of Handling People.*" Dr. Crane's address was enthusiastically received.

Dr. Cartwright expressed the Society's appreciation for Dr. Crane's inspiring address and invited the members present to write the officers of their reaction to the meeting, with any suggestions for improvement that might occur to them.

There being no further business the meeting adjourned at 10:20 p.m.

Approximately 600 members and guests were present.

Answer.—Caries is a bacterial disease which depends largely on local oral factors such as accumulation of food debris, enzymes which promote or inhibit bacterial action, the character of food in so far as it is fermentable or promotes bacterial activity, and the saliva. The role of systemic factors in the production of caries is not understood. Systemic therapy has therefore not been scientifically established. The lowered calcium level of the patient's blood calls for diagnosis and treatment. While a low calcium level may conceivably affect the buffer action of saliva, it is not likely that it is related to the high susceptibility to caries. Disturbances in calcium metabolism have not been shown to be significant in caries. Treatment, therefore, should consist of the removal of the carious lesions and the restoration of the lost portions.

Unfortunately, treatment other than dental restorations is not known. It is important that free fermentable carbohydrates be eliminated from the patient's diet and that oral hygiene be followed.—*Queries and Minor Notes. J.A.M.A. 117:1142 (September 27) 1941.*

Clinic Committee Plans Innovation of Oral Diagnosis Clinic at 1942 Midwinter Meeting

Appeal Made to Members to Send in Problem Cases to Be Solved by Well Known Specialists

The introduction of an Oral Diagnosis Clinic at the 1942 Midwinter Meeting has been occupying the center of attention at recent Clinic Committee meetings. This innovation has been placed under the direction of Dr. John H. Hospers, who is now making an appeal to all members to send in their problem cases. The clinic will consist of an advisory staff of six of the best known men in their field to whom all cases will be given for solution and presentation during the General Clinic session in February.

REQUIREMENTS

In submitting the cases to the Committee, members are asked to follow these simple requirements:

1. Write a detailed description of the case and be sure it is signed.
2. Enclose a radiograph or plaster model of the problem.
3. Send material to Dr. John H. Hospers at 25 East Washington Street.

Since there is only a limited time to complete plans for the program, the Committee suggests that dentists having difficult problem cases call in those patients now for the necessary radiographs or impressions. Upon receipt of the material, Dr. Hospers will decide who on the advisory staff is best qualified to advise correct treatment and turn over the problem to him for solution.

The Committee believes that this type of clinic is the answer to the generally expressed need of the average dentist. Unlike the members of the medical profession who rarely attempt the wide variety of treatment which falls into the daily practice of general dentistry but who call upon their hospital staffs for help in treating difficult cases, the dentist makes an effort to solve these prob-

lem cases himself or withdraws treatment. Dentists generally agree that cases of this sort are overlooked too often, whereas if a favorable prognosis on a truly difficult case can be planned, it does much to enhance the man's reputation in his own community. Service of this character is a step toward the profession's goal of providing the highest type of dentistry.

HOSPERS

"This clinic," Dr. Hospers said, "is to vocalize the problem sections that are found in some of the dental magazines. The success of the clinic depends entirely on the cooperation of the members at large. Here is an opportunity for members to present their problems, to have the benefit of the best advice for their solution and to participate in the possible discussion that will help clarify them. The Committee asks that the members send their problems in now. The names of the clinicians who will participate in this clinic will be published as soon as they have been selected."

The clinic will be held in connection with the General Clinics and is open to all those in attendance at the Midwinter Meeting. Plans are being made to present the individual problems at table arrangements which will accommodate only small groups, but these will be repeated often enough so that everyone interested will have a chance to benefit from the discussion and demonstration. It is expected that this new feature will prove a popular addition to the clinic program. Dr. Henry F. Andree, Chairman, and Dr. A. C. Kuncl, Vice-Chairman of the Clinic Committee, join with Dr. Hospers in appealing to the membership to make this Oral Diagnosis Clinic a success.

NEWS AND ANNOUNCEMENTS

AAA LABORATORY CONVICTED; FINED \$200.00 AND COSTS

The AAA Laboratories, Inc., 1555 North Milwaukee Avenue, was found guilty of violating the Dental Practice Act on November 6 by a jury in the Municipal Court of Judge Leon Edelman. A fine of \$200.00 and costs was assessed by Judge Edelman after delivering a scathing rebuke to the defendant. It was indicated that the AAA Laboratories would appeal the decision.

DR. HOWARD MILLER NEW A.D.A. TRUSTEE

Dr. Howard Miller was elected trustee to represent the eighth district by the House of Delegates at the recent convention of the American Dental Association in Houston, Texas. The eighth district comprises the State of Illinois. Dr. Miller succeeds Dr. W. H. G. Logan.

EXHIBIT MANAGERS ELECT OFFICERS AT HOUSTON

Mr. John J. Hollister, Executive Secretary of the Chicago Dental Society, was elected Secretary and Treasurer of the Dental Exhibit Managers' Association. This recently organized association held its first annual meeting in conjunction with the American Dental Association convention in Houston.

GIES AWARD GIVEN TO DR. F. B. NOYES

Dr. Frederick B. Noyes, Dean Emeritus of the University of Illinois College of Dentistry, was given the William John Gies award for achievement in research at the recent convocation of the American College of Dentists in Houston, Texas. The purpose of this honor is

to give recognition to one who, in any field of science, has made an outstanding contribution to the progress of dentistry, or who has devoted himself unselfishly over a number of years to the organizational, scientific and socio-economic interest of the profession. Only one award may be given in any one year.

ILLINOIS ALUMNI HOMECOMING TO BE HELD DECEMBER 3

The annual homecoming of the Alumni of the University of Illinois College of Dentistry will be held Wednesday, December 3, at the College at 808 South Wood Street. A scientific program has been arranged for the day. A complimentary lunch will be served at noon, and a banquet will be given in the evening in the Illini Union Building. Details of the program will be announced in the next issue. *M. K. Hine, President.*

SOUTH SIDE RECREATION CLUB TO BE FORMED

The formation of a bowling and recreation club made up exclusively of members of the South Side branches is the result of an expressed desire of the members for more activity along recreational lines. The Sports and Pastimes Committees of the Englewood and Kenwood-Hyde Park Branches believe that this club will be the answer to their problem. When plans have been completed, the club members will meet weekly on Wednesday afternoons.

Tentative arrangements have been made with one of Chicago's finest bowling establishments, the Hyde Park Recreations, 5124 Lake Park Avenue. This place has been selected because it is up to date in every respect and the management has offered the club the ex-

NEWS AND ANNOUNCEMENTS

clusive use of one entire floor of fourteen modern alleys. Included in their facilities is a large meeting room, which may also be used for ping pong, cards, pinochle or poker.

The group will operate on a handicap basis so it makes no difference whether or not the individual members are expert bowlers. Each will have the same chance as the handicap will equalize all. Free instruction will be given to those desiring it. For a really enjoyable time and an opportunity to know more of the members and to participate regularly in a fine form of healthful recreation, be sure to come to the Hyde Park Recreations Wednesday, November 26, and every Wednesday from then on.

DR. ADELBERT C. BAUR 1874-1941

Dr. Adelbert C. Baur, a member of the Northwest Side Branch, died on September 24 in his home at 3104 Logan Boulevard after an illness of five weeks. Dr. Baur was born in Ann Arbor, Michigan, and was 67 years old at the time of his death. He was a graduate of the University of Michigan and of the Chicago College of Dental Surgery, class of 1898.

Dr. Baur was an active Kiwanian, having been a charter member of the Logan Square Kiwanis. He was also a member of the American Dental Association and the Illinois State Dental Society.

Surviving Dr. Baur are his widow, two sons and a daughter. The officers and members of the Chicago Dental Society extend their sincerest sympathies to the bereaved relatives.

DR. EDWARD F. KENYON 1869-1941

Dr. Edward F. Kenyon, past presi-

dent of Kenwood-Hyde Park Branch, died in his home on October 8. Dr. Kenyon was born in Chicago on November 14, 1869. He graduated from a Chicago high school and later went to Elgin where he started doing electrical work. It was not until the World's Fair in 1893 that he became interested in dentistry and enrolled in the American College of Dental Surgery, now Northwestern University Dental School, from which he graduated in 1895.

Dr. Kenyon was an active member of the Kenwood-Hyde Park Branch, having served as its president in 1929-1930. He joined the Chicago Dental Society in 1909, was a Life Member of the Illinois State Dental Society and a member of the American Dental Association. Besides his dental affiliations, Dr. Kenyon was an active Kiwanian and a member of the Masonic Order, Landmark Lodge.

The surviving relatives are his widow, three daughters, a son and three grandchildren. The Chicago Dental Society extends deepest sympathy to his many friends and relatives.

SEND CHRISTMAS SEAL CONTRIBUTIONS IN NOW

American Dental Association Christmas Seals have been sent to all members, according to an announcement received from Dr. A. Florence Lilley, Associate Member of the American Dental Association Relief Fund Committee of Illinois. Members are asked to give as generously as possible and to send their contributions direct to the American Dental Association office, 212 East Superior Street.

For the convenience of members, a booth will be set up in the Palmer House the evening of the Chicago Dental Society monthly meeting on November 18, where contributions will be accepted.

Community Fund Nearing Objective in Its Campaign to Raise \$3,583,000

Dental Unit, Headed by Dr. Frederick B. Noyes,
Reports on the Progress of Its Division

With a grand total of \$2,564,031 in subscriptions already recorded in Chicago's 1941 Community Fund campaign, the entire campaign organization, numbering more than 50,000 volunteer workers, has moved into full stride toward its objective of \$3,583,000.

DENTAL UNIT

Along with other professional and trade groups throughout the far-flung campaign organization, the Dental unit, headed by Dr. Frederick B. Noyes, reports intensified solicitation with the objective of covering thoroughly the entire Chicago dental profession.

In this connection, Dr. Noyes states that campaign leaders, headed by General Chairman James S. Knowlson, are agreed that more subscriptions, from those able to assume their fair share of this community responsibility, are essential to the success of the campaign.

INCREASES

"In many notable instances, subscriptions we have received thus far show gratifying increases over the amount given in last year's Community Fund campaign," he commented. "We are, however, anxious to reach those who, for one reason or another, have not given in previous campaigns. Included among these, of course, are the many new residents of Chicago who have moved to this city during the past year."

QUOTA

With a quota of \$1,000 assigned this unit, Dr. Noyes is being assisted by the following vice-chairmen: Dr. Glenn E. Cartwright, Dr. Charles W. Freeman, Dr. Fred W. Gethro, Dr. William H. G.

Logan and Dr. Harold Welch. Of that quota, \$701.00 has been received up to date.

CHARITABLE SERVICES

Upon the final outcome of the campaign depends, in large measure, the maintenance of charitable services carried on by 185 Catholic, Protestant, Jewish and non-sectarian welfare agencies in Chicago. Of the entire amount subscribed in the campaign, 96 per cent will be allocated directly to these agencies, only 4 per cent being reserved for campaign and year around administration expenses of the Fund.

KNOWLSON

Knowlson urges that, as the Community Fund army of 50,000 volunteer workers moves ahead with its task, "let us not forget that other and much larger army, the army of broken families, dependent children and destitute old folks, the sick and the handicapped in whose behalf the campaign is being conducted.

"For these, the defense boom holds no hope of employment," he added. "Their problems, of whatever nature, are dependent wholly upon the services of the Community Fund agencies, but let us not forget that the capacity of these agencies to serve depends upon our own generosity in the present campaign."

CONTRIBUTIONS

Since the campaign will close on December 1, dentists are urged to send in their contributions immediately so that dentistry's quota can be fulfilled. Send all contributions to Dr. F. B. Noyes, 55 East Washington Street. Acknowledgments are made of all contributions.

EDITORIAL

PAN-AMERICAN FRIENDSHIP

An innovation at the 83rd meeting of the American Dental Association was the Pan-American Day. Its purpose was to emphasize the desirability for cooperation and contact between the dentists of the Americas. A number of Latin-American dentists were introduced at the first general session and a brief address was made to them in Spanish by Dr. C. Caraballo of Tampa, Florida. Consuls representing 13 Pan-American nations were present at the luncheon given by the American Dental Association for them and the Latin-American guests. The luncheon was attended by over 200 of our members and representatives of dental organizations from eighteen republics in the Western hemisphere. Immediately following the convention several members of the American Dental Association left for Mexico to participate in a study club program in Mexico City. This "good neighbor policy" is to be commended and the interest shown in the first attempt at Pan-American dental solidarity speaks well for future developments.

"ABOUT FACES"

The opening general session of the convention featured the world premiere of the dental health educational motion picture entitled "About Faces." This was presumed to be no ordinary picture as it was reputed to have cost the Georgia philanthropist, Cator Woolford, the sum of \$10,000.00. Mr. Woolford was present and was given a suitable plaque attesting to the gratitude of the dental profession for his unselfish contribution to the public welfare. A few short addresses by dental officials of Georgia were made and the film was then exhibited. It was a disappointment to many. It is not important that the mechanics of presentation were poor—what is important is that as a medium of dental health education, it leaves a great deal to be desired. The photography appeared to be good, but the script or scenario was distinctly amateurish and the acting even more so. Although nothing is known of the circumstances attendant upon the film's production, it does seem that \$10,000.00 could have purchased a more effective medium of dental health education. Too few philanthropists smile upon dentistry; when they do the greatest good should be obtained from their funds.

SCIENTIFIC EXHIBITS

The Scientific, Health and Education Exhibits offer a medium of dental education which few other divisions of a dental convention possess. They afford an opportunity to see and to discuss personally new developments with those who have made the study, an opportunity unequalled except perhaps by table clinics. This section of the convention of the American Medical Association is said to be the most popular because of the excellence of the exhibits and the required presence of the exhibitor at his booth. The tendency at dental conventions has been to regard the exhibits as trimming. However, there has been a steadily increasing interest in this division and the Houston meeting was no exception. The corridors of the exhibits were well filled throughout the week by dentists who found useful information in the many fine and well arranged exhibits. Awards were given for the best exhibits and the announcement of the winners was made on the first afternoon. This early judging stimulated additional interest. The exhibits were so classified this year that those developed by individuals did not have to compete with those developed by institutions and organizations. Separate awards were given which made a more equitable judging possible as the resources of an individual in the preparation of an exhibit are not as great as those in an institution or organization.—*Robert G. Kesel.*

NEWS OF THE BRANCHES

KENWOOD-HYDE PARK

Tuesday night the joint meeting of Kenwood-Hyde Park and Northwest Indiana Dental Societies gathered at Phil Smidt's, ninety-eight strong. The group was entertained during the dinner in fine fashion by the Metropolitan Quartet. Dr. LaMar Harris, Dr. Stanley Tylman and Dr. E. Byron Kelly were the speakers of the evening. The interest shown was evidenced by the fact that at twelve o'clock they were still going strong . . . Meth Methven is said to be somewhere between here and Houston, Texas, fishing, which accounts for the fact that he was absent from the fine meeting Tuesday night . . . Chairman of the Program Committee, Ralph Libberton, was absent from the meeting because of illness . . . Sig Carlson's mother died last Tuesday. The funeral was held Friday at Edgar Funeral Chapel, 77th and Aberdeen Streets . . . The Louie Christopher family is expecting and since there are two boys in the family now, they are hoping for a girl . . . I hear that stout-hearted Howard Strange is building a Colonial modern home in Flossmoor and expects to move into it about December. I also heard that he took a plane to Watertown not long ago where he and three other crack shots got so many pheasants they would not give out the number . . . Tommy Thompson told of his unique trip with a friend from Joliet, Illinois, who with their wives went hunting in a trailer outfit. Boy, what stuff! They traveled to Canada, where they killed 80 prairie chickens, 40 Hungarian partridge, and 50 ducks. They spent three weeks in Canada so this is no fish story. On their way home they stopped in South Dakota and hunted pheasants; the number killed was not revealed. They did run across the Duke and Duchess, but they were out of range . . . I was pleased to see L. J.

and J. O. Hitz at the meeting Tuesday. J. O. said their vacation this summer consisted of a very enjoyable trip to New York.—*Ralph N. Sappe, Assistant Branch Correspondent.*

NORTH SUBURBAN

12! 13! 14! Mystic numbers, no doubt, but they tell the tale of the early hibernation of the boys north and west of here. The Northwest Credit Association held a meeting on Monday, November 3, at the Congregational Church in Des Plaines. Twelve members turned out to be entertained by some excellent colored motion pictures taken by that enthusiastic photographer, John Heller. John obtained these pictures during his vacation trip to Havana, Mexico City and Guatemala last spring . . . The Lake County Dental Society, thirteen in number, met at the Moraine Hotel in Highland Park on that same evening. Being pictorially minded also, they were shown some "old timer" snapshots taken back in 1933 by George Postels. Mr. Francis Moyer furnished the scientific interest with a demonstration of the Roach attachment . . . The Kenilworth-Winnetka-Glencoe Study Club marshalled 14 of their members together on Tuesday evening, November 4, at the Indian Trail Tea Room in Winnetka. Dr. Paul C. Salisbury of Northwestern University Dental School was the speaker. His talk dealt with oral surgery problems and was illustrated with slides, all of which was presented in the usual masterful Salisbury fashion . . . The Evanston Community Chest drive has come and gone and a number of Evanston dentists did yeoman service. The old reliables, L. V. Stephenson, John McGuire, Bill Rusch, Hal Chason, Willard McEwen, and Jim Carter were aided by a newcomer to the ranks, Stan Richards. Despite their earnest endeavors only 48 out of the 90 or more dentists in the community contributed

anything. The excuses ranged all the way from "a new born babe" (a quite legitimate reason) to the obviously unpatriotic one of, "too many taxes"; as if all those who did contribute to the fund didn't have to pay an equal amount or more. O. B. Davy was one of the residential workers, a much more arduous assignment . . . We welcome two new members to the fold, G. A. MacLean who has taken over A. B. Larson's space in the Church Street Building, and Everett L. Upton, who has opened an office in Waukegan. Both are from the University of Illinois, class of 1941, and, like all good Illinois graduates, put their first \$15 into a dental society membership . . . George Howell, of Winnetka, is laid up with an infected foot. George was in the hospital for a week but is home now recuperating . . . Ed Robbins bagged his annual flock of pheasants, or is it a covey? Anyway, the word flock is used advisedly, they are that abundant in South Dakota.—James H. Keith, Branch Correspondent.

NORTHWEST SIDE

Since this copy of the sprightly FORTNIGHTLY reaches our members the morning after our regular monthly meeting, your reporter will have to wait until the next issue to give his reaction to what the members may want as material for other meetings. Too much cannot be said about the subject of practice management even though the subject becomes a little threadbare after all the more vocal economists have had their say, and the general membership sits quietly by without giving a clue as to whether or not any of the effusions have penetrated . . . Quite a few of our active names were in Houston for the American Dental Association meeting and they say that the business meetings were liberal education in the gentle art of log rolling . . . Herman Wenger took over the job that usually belongs to some one else at these meetings, that of filling up note books with all sorts of notes that afterwards need a translator

to be useful . . . August Giraldi thought the Houston meeting a good place to introduce his recently acquired wife to what dentists look and act like when at play. Not a bad idea, and also setting of a precedent so that when he does want a night out the word meeting will be the Sesame . . . Have you made your contribution to the American Dental Association relief seal cause? What with all the various contributions that we are being asked to make, we should not forget that the old saying, "charity begins at home," is not as selfish as it may seem. Helping some fellow dentist over a hump should bring just as warm a feeling to our members as being asked for a hand-out and being unable to refuse because of the chance of having some patient not like it. This is the one cause that doesn't carry that subtle blackmail idea and one in which no one except the giver will know what was given.—Ben Davidson, Branch Correspondent.

WEST SUBURBAN

On Thursday, November 6, State Psychiatrist Dr. Paul Schroeder, in charge of the Illinois Institute of Juvenile Research, spoke before the Branch on "Dental Hygiene and Mental Hygiene" . . . The Round Table programs scheduled for the future are: *Trends in Dental Education*, by Dr. R. W. McNulty on November 18; *Suggested Bases for a Just and Durable Peace*, by Dr. Albert Buchner Coe on November 25; *A Workable Denture Occlusion*, a patient demonstration with our own Dr. Henry S. Stimson, the speaker and clinician, on December 2; *"The F. B. I. and National Defense,"* by A. H. Johnson, Acting Director of the Chicago Area, on December 9 . . . The above announcements were printed and distributed by Program Chairman H. P. Westaby, who donated his valuable time and services in doing this in his own Hobby Print Shop. H. P. deserves a big hand for using his hobby hours to our Round Table advantage . . . It was a girl, Patty Lee, at the

Robert Wirths and cigars at the meeting. Congratulations, Bob . . . We were sorry to have missed Major R. Mulholland's visit to Chicago. The Major has been transferred to Carlisle Barracks, Pennsylvania . . . C. A. Hanson and wife are taking a motor trip through the Ozarks. Perhaps a farm or a hunting and fishing lodge are in the immediate future . . . We were pleased to have R. D. Clark as a recent visitor to the Round Table . . . A. H. Vollertson is back at work after a brief absence owing to an operation . . . R. I. Humphrey, R. W. McNulty, E. E. Graham, and R. J. Pollock were some of our members who attended the convention at Houston . . . A. J. Ryan is up in Canada on a ten-day hunt for moose . . . E. Moore rolled a 627 series for the bowling team. The West Suburban team is in the Oak Park Service League and needs some more good bowlers. How about helping them out? . . . We know W. J. Gresens shies from publicity, but just think, Werner, what will happen if that sweepstakes ticket you recently bought should win!—Joseph M. Lestina, Branch Correspondent.

ENGLEWOOD

Now that the cool fall days have set in we find that the boys have turned from golf and fishing to hunting and football . . . Rooting for Northwestern University out at Dyche's Stadium on Saturday afternoons is harder than working, according to Ben Jostes, especially when the Gophers are in town . . . Our friend, Gerald Henneberry, missed the opening of the duck season because of Ol' Man Flu, but he is planning to open the pheasant season next Monday with Ed Glavin to help him . . . Ray Gates is another hunting enthusiast who is having a big time these days . . . E. C. Warfield opened the pheasant season in North Dakota last week with a full bag and is planning a return trip next week . . . Adolph Gumpel is busy these days supervising the building of his new home . . . Ed Glavin was

plenty busy Hallowe'en night when he served as judge of the Foster Park celebration . . . Captain Val Siedlinski left Saturday for an extended period of active duty. He is stationed at Fort Sill, Oklahoma, in the school for field artillery instruction . . . John Kelly's mother is reported to be very ill. We extend our best wishes for a speedy recovery . . . Elmer Ebert and Chester Blakeley, President-Elect and Vice-President, respectively, of the Kenwood-Hyde Park Branch, have been welcome guests at the last several meetings . . . Englewood was fortunate in having Municipal Judge Cecil Smith as a speaker for the Armistice night meeting. Judge Smith has been attached to the South Chicago branch of the Municipal Court for some time and is a very entertaining speaker. The plans for the December meeting are not completed but don't forget to reserve the evening of December 9 as our annual Old Timers' night will be held and as usual a good time will be had by all.—Albert J. Tanis, Assistant Branch Correspondent.

WEST SIDE

Programs to be presented at the Forum of the West Side Branch are: November 18, a motion picture on the Vitamin *1B Complex*; November 25, Dr. Robert G. Kesel will present a colored motion picture on *Vital Pulp Removal and Root Canal Filling*, and December 2, E. R. Butterfield will talk on *Dentifrices*. The luncheons are held at 12 noon in Solick's Restaurant, 4207 West Madison Street . . . At the meeting on November 4 short papers were read by George F. Barnes, Thomas L. DeVito and Foster G. Robeson of the West Suburban Branch, on the subject, *Should We Have a Stronger Organization?* all of which were well received . . . On December 9, the regular monthly meeting will convene. Our Program Chairman, Michael DeRose, is planning to have a speaker on the subject of periodontia. Entertainment will follow the dinner which is scheduled at

6:30 p.m. at the Graemere Hotel . . . The Lawndale Dental Club cordially invites the West Side members to attend its meetings which take place the first Friday of each month at Eagle's Hall, 3945 West 26th Street at 9:00 p.m. . . . Anton J. Jirsa passed a recent Army physical examination for active service in the Dental Corps. He is a captain in the reserves and will be assigned to Camp Helen, Texas, after December 1 . . . Anton P. Lombardo was delighted by the return of his comparatively new car which was stolen from in front of his home several weeks ago . . . Harry J. Cornwell has decided against the rugged outdoor life of the far West in favor of the more restful and luxuriant surroundings of Florida, from which he will return by the end of the month . . . Joseph A. Pfister, having been on the sick list for the past several weeks, will recover in time to escort his daughter, Adeline, down the aisle on Thanksgiving Day . . . George F. Barnes will soon be in need of a new dental assistant. Katherine Burgess, who has been with him several years, is to be married the last week of November . . . Joseph F. Porto's sister-in-law, Bernadette LaMay, recently arrived from Lewistown, Montana, for a few days' visit before continuing her journey to Ottawa, Canada, where she will apply for enlistment as a nurse in the Royal Canadian Air Force . . . Eli Olech has a well-filled clinic program this month: November 10, Freeport, Illinois, on *Surgical Preparation of the Jaws for Immediate Dentures*; November 20, Kankakee, Illinois, on *Principles Involved in Extraction of the Teeth and Complications Following the Extraction of Teeth* . . . Victor Griseto, our Sports Chairman would like your expression relative to a Saturday evening bowling party similar to the golf tournament held each summer . . . Having searched in vain for a duck hunting episode, the nearest approach remains that of having talked to man who saw a man shoot at a duck.—*George F. Vogt, Branch Correspondent.*

NORTH SIDE

Ac. . . ics will be the theme of the paper Dr. Stanley D. Tylman will read at the North Side meeting on Monday, December 1. Dr. Tylman, head of the Crown and Bridge Department at the University of Illinois, a past president of the Chicago Dental Society and author of *Crown and Bridge Prosthesis*, is sure to give us much of interest on this new addition to dentistry. At 6:30 p.m. dinner will be served in the Michigan Room at the Edgewater Beach Hotel. The scientific meeting will begin promptly at 8 o'clock . . . The North Side Bowling League has room for a few more members; if you are interested, phone W. M. Young, Wellington 4411 . . . George White spent a week in Marion, Illinois, visiting old friends and shooting quail . . . John T. Brahm has returned from Webster, South Dakota, where he spent ten days duck hunting. He reports a good time and good hunting . . . Scott Davidson shot quail at Centralia, Illinois . . . E. B. Clearwater is having a good time with his new x-ray machine . . . On September 20 Roger Stockton was married to Helen Berg . . . S. Albert Sigel has been ill for some time but we are glad to report that he is doing nicely and expects to return to his office soon . . . Clyde and Mrs. West attended the golden wedding celebration of friends in Watseka, Illinois . . . Donald Coughlin has been transferred to the battleship *Utah* . . . Bob and Mrs. Kent spent a week-end visiting Mrs. Kent's family in Minnesota . . . The North Side was well represented at the Houston meeting. Manley Elliott, George Teuscher, Fred Molt, Leo Kremer and Harold Hillenbrand were among those seen. Harold Oppice read a paper on *Children's Dentistry*. E. C. Pendleton won a prize for his scientific exhibit . . . Joe Laskowski is doing all right with his bowling by maintaining a 200 average in his league . . . Our sympathy goes to Erwin Melsher, who lost his father recently.—*Roland A. Weber, Branch Correspondent.*

Income Tax on Bad Debts?

Under a recent decision of the Supreme Court your estate will pay income tax on the accounts you leave on your books at your death.

Space here will not permit explanation of how this affects every doctor, but one way to avoid this—to eliminate credit losses yourself—and to render your patient a financial service, as well as professional, is to

OFFER THE PROFESSIONAL BUDGET SERVICE

7359 Cottage Grove Avenue
Chicago

For Your Patients, Doctor

There is no time when the use of a budget plan is more valuable or better justified than when dental care is needed.

By offering a low cost budget plan to your patients, you often make it possible to give them the care which you know they should have and which they might not get if such a method for payment was not available.

On accounts over \$100.00, the service charge to your patient is only 5% of the bill for 10 months or 6% of the bill if paid over a period of 12 months. For example, if the bill is \$110.00 and the patient prefers the 10-month plan, the service charge is only \$5.50, making the total contract \$115.50, which can be paid in 10 monthly payments at \$11.55 each.

On accounts under \$100.00 there is a minimum charge of \$5.00 which permits your patient to pay the bill in 10 equal monthly payments.

You receive your check in full at once—less your discount.

You are doing your patients a real favor by offering a low cost budget plan.

NO CO-MAKERS REQUIRED

L. T. ELLIS COMPANY *Commercial Credit Bankers*

TELEPHONE - FRANKLIN 1593

33 NORTH LA SALLE STREET - CHICAGO

The L. T. Ellis Company is NOT a collection agency.

Financing the Public

Mrs. Jones, who cannot purchase one dollar's worth of merchandise at a department store without having her credit record checked through the mercantile exchange file, walks out of your office with fifty dollars worth of dentistry, merely because Mrs. Smith, an old patient, sent her to you.

Mrs. Smith may know nothing about the credit habits of Mrs. Jones. She just plays bridge with her on Wednesday afternoons.

If specialists in the extension of credit will not pass judgment on an applicant without investigating through every known source of information, why should a dentist think he can safely do so.

The real answer to your problem is the use of preventive measures. Investigate before you invest your time and materials. Place your practice on a business basis by using recognized business methods in the handling of your patients.

As a member of the Doctors' Service Bureau, the maximum in credit checking facilities are immediately placed at your disposal. No other organization can offer you authentic information from the files of other dentists and physicians, combined with the mercantile information service used by the merchants, banks, installment houses, finance companies and real estate organizations.

Danger in his day's work

....but he shrinks from dental pain!

NOVOCAIN, PONTOCAIN,
COBEFRIN: Reg. Trademarks

PREVENT PAIN . . . ALLAY APPREHENSION WITH COBEFRIN SOLUTIONS

"He hurt me too much" is the common complaint of many patients who "change dentists" but who could be taught that your efforts to prevent pain are equally as important as your skillful work and use of fine materials.

In most instances, this attitude readily responds to the protection-against-pain made possible by routine injections of Novocain with Cobefrin, Cook or Waite—or Novocain-Pontocaine-Cobefrin, the new saline-base Waite formula for prolonged anesthesia. Both of these Cook and Waite anesthetic solutions are dependable. They are equally uniform, free from disturbing side-effects.

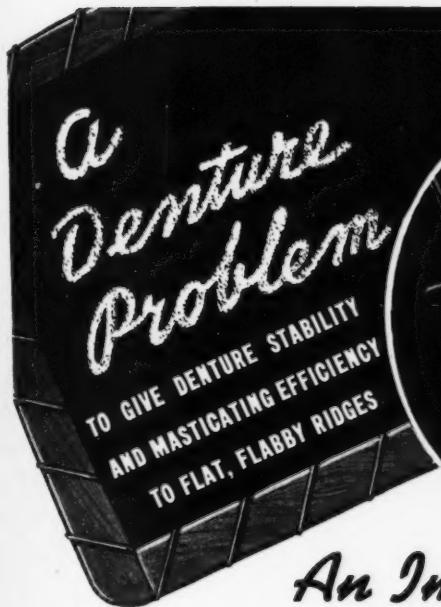

Select one for that next "sensitive" case, and learn how valuable these anesthetics can be in your practice.

of the Answer . . .*

TRUBYTE NEW HUE 20° POSTERIORS

IMPORTANT because the miniature fine knives carved into occlusal surfaces permit efficient mastication . . . and because the wide food table follows nature's plan for proper mastication.

Important, too, because low cusps and narrow contacting area minimize trauma by reducing excessive lateral pressure, and assure stability of the dentures.

... that's what they are saying up and down the land—in cities, on trains, on airliners—all over America.

There's a friendly ring to that farewell. Friendly, because it means something real and warm—a definite place.

And you hear people say that with conviction, too. Conviction, because they know this great, friendly Hotel through both experience and reputation. They know that they can see their friends and associates at The Stevens any time . . . as a convention delegate or as transient guest . . . in casual meetings in the lobby or perhaps in one of the dining rooms.

"I'll be seeing you at The Stevens." Of course. That's what traveling America is saying—saying with gusto and plenty of enthusiasm.
